**Panel moderator: Jeff Todd, Prevent Blindness**

# 500 Cities: Local Data for Better Health

## Measures Tracked

### UNHEALTHY BEHAVIORS

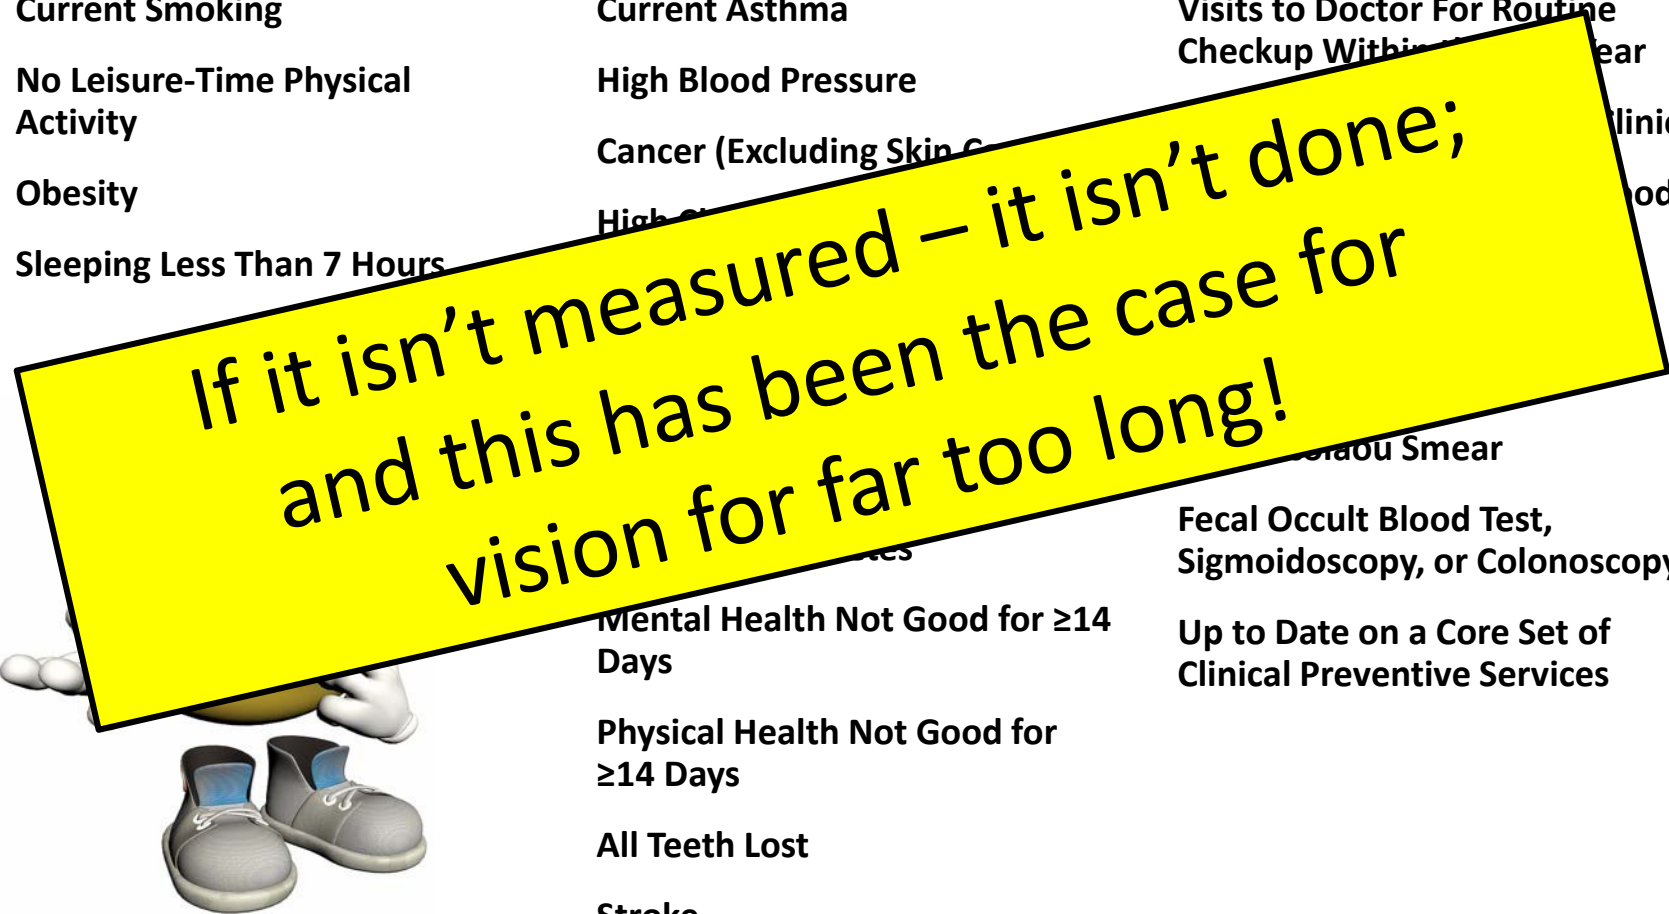

Binge Drinking  
Current Smoking  
No Leisure-Time Physical Activity  
Obesity  
Sleeping Less Than 7 Hours

### HEALTH OUTCOMES

Arthritis  
Current Asthma  
High Blood Pressure  
Cancer (Excluding Skin C...  
High Cholesterol  
Mental Health Not Good for ≥14 Days  
Physical Health Not Good for ≥14 Days  
All Teeth Lost  
Stroke

### PREVENTION

Current Lack of Health Insurance  
Visits to Doctor For Routine Checkup Within 12 Months  
Pap Smear  
Fecal Occult Blood Test, Sigmoidoscopy, or Colonoscopy  
Up to Date on a Core Set of Clinical Preventive Services

If it isn't measured – it isn't done;  
and this has been the case for  
vision for far too long!

**VEHSS**

- CDC Cooperative agreement awarded to NORC in 2015
- 4-year project currently in year 2 of development

Focus on  
Eye Health  
National  
Summit:

*What's in Sight?*

- Centers for Disease Control and Prevention

- NORC at the University of Chicago

- The University of Wisconsin-Madison School of Medicine and Public Health

- Prevent Blindness

- American Academy of Ophthalmology

- VSP Inc.

- Additional partners:
  - KPMG
  - HIV Counts
- Potential future partners:
  - The University of Washington's Institute for Health Metrics and Evaluation (IHME)
  - Uniformed Services University of the Health Sciences
  - American Optometric Association
  - Northrop Grumman

## VEHSS Specific Aims

- Create new prevalence and service utilization estimates
- Identify current disparities
- Design the capacity to update, identify trends and measure impacts
- Disseminate information

## System Development: 5 Simple Steps

1. Identify and select available data
2. Define data indicators and case definitions
3. Generate single-source estimates
4. Integrate data sources into comprehensive estimates
5. Transparency and dissemination

## Review of Step 1: Data Selection

- National surveys
- Administrative claims databases
  - Medicare, Medicaid, VSP, MarketScan
- EHR databases and Registries
  - IRIS Registry
- Population-based studies and meta-analyses

## System Development: 5 Simple Steps

1. Identify and select available data
2. Define data indicators and case definitions
3. Generate single-source estimates
4. Integrate data sources into comprehensive estimates
5. Transparency and dissemination

## Define data indicators

- Indicators are the measures that we will capture in each data source
  1. Diagnosis categories
  2. Service utilization
  3. Visual function categories
  4. Surveys instrument categories

# 1. Data Indicator: Diagnosis Categories

1. Identified ~5,000 diagnosis codes
  - a) ICD-9 and ICD-10 codes
2. Organized into 2-level organization system
  - a) 17 categories
  - b) 79 subcategories
3. All diagnosis codes are assigned to a single subcategory

## Diagnosis Categories

Category 1. Retinal Detachment and Defects

Category 2. Diabetic Eye Diseases

Category 3. Age related macular degeneration

Category 4. Other Retinal Disorders

Category 5. Glaucoma

Category 6. Cataracts

Category 7. Disorders of Refraction and accommodation

Category 8. Blindness and low vision

Category 9. Strabismus and amblyopia

Category 10. Injury, burns and surgical complications of the eye

Category 11. Disorders of optic nerve and visual pathways

Category 12. Other visual disturbances

Category 13. Infectious and Inflammatory diseases

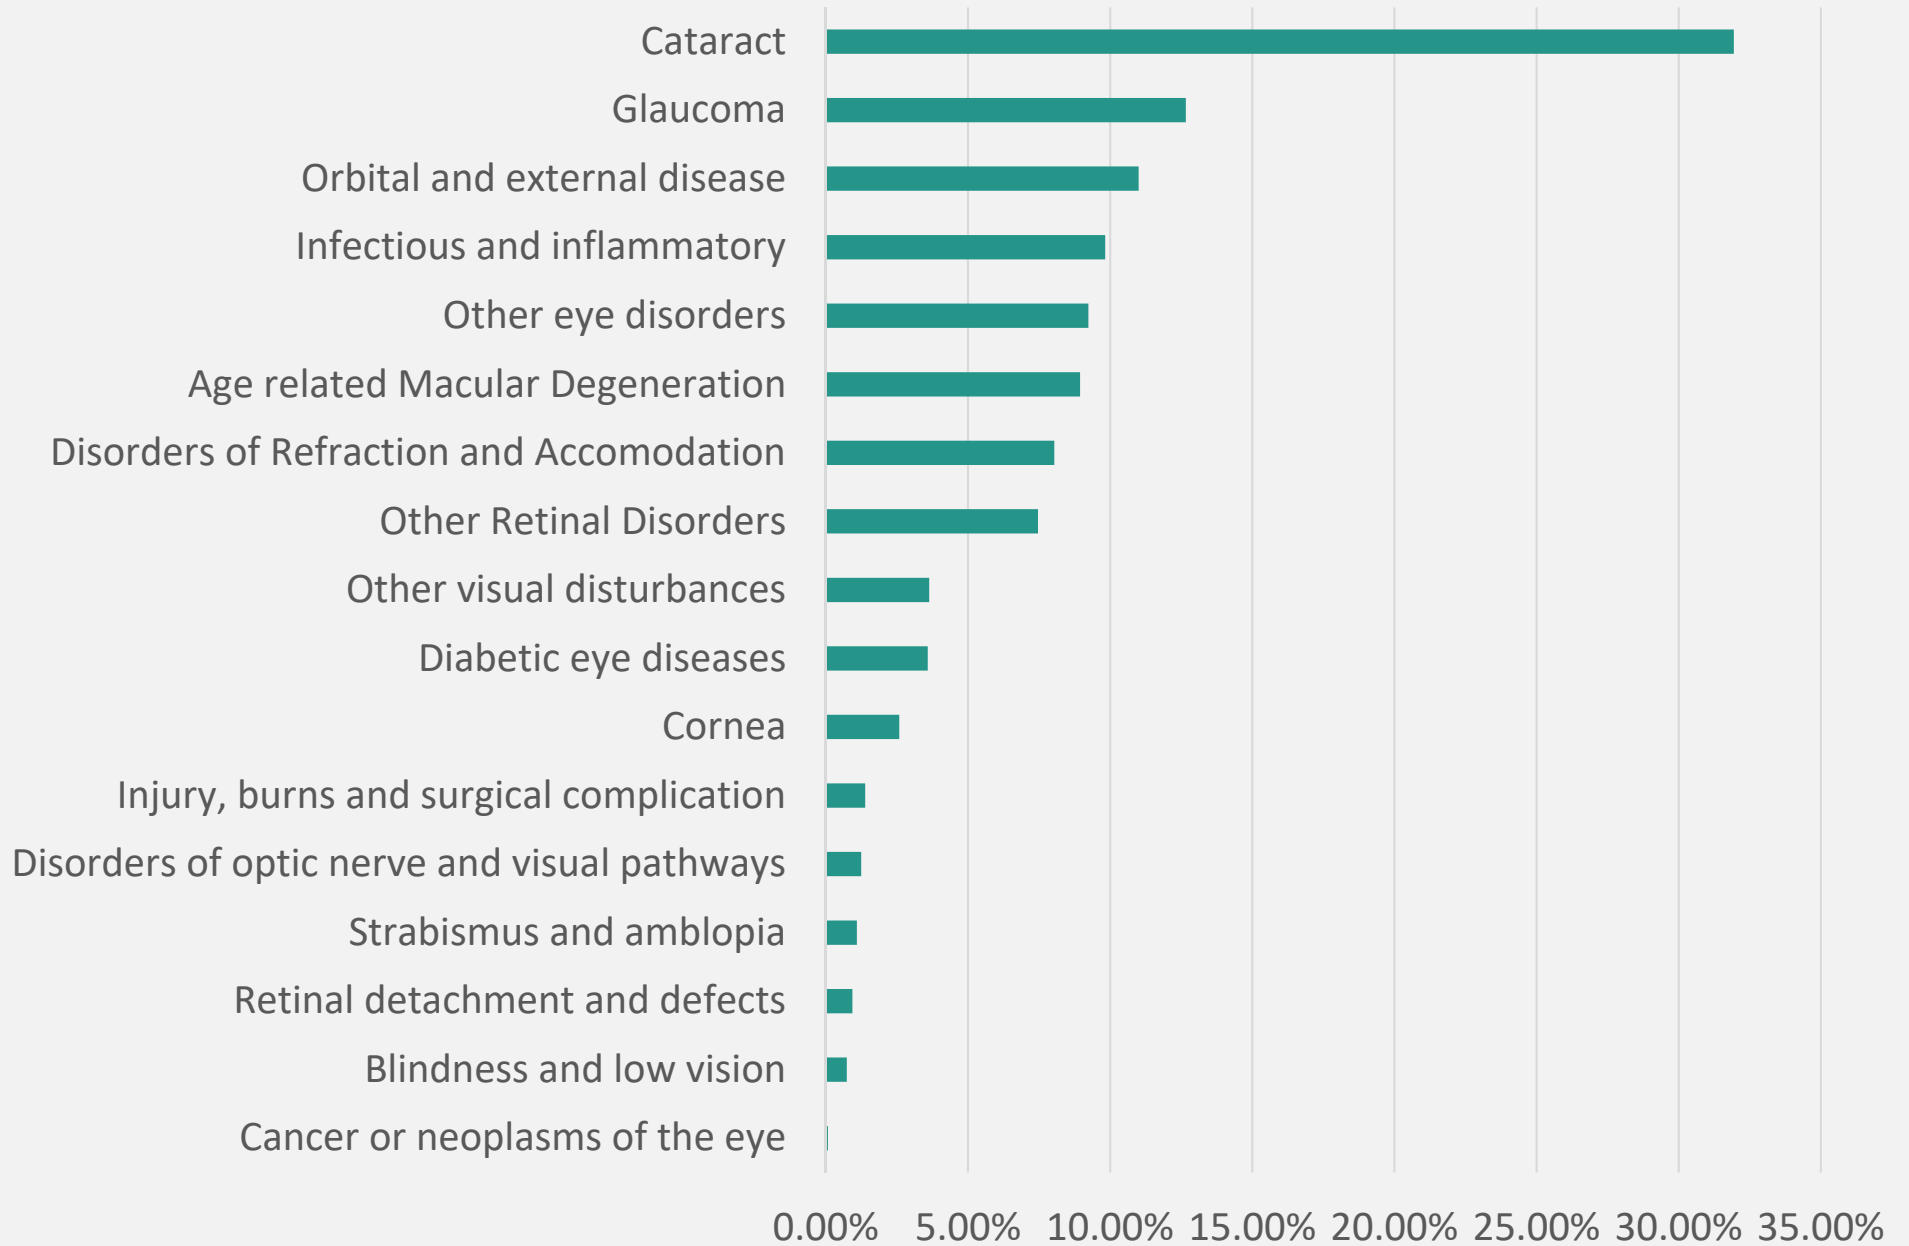

Category 14. Orbital and external disease

Category 15. Cancer and neoplasms of the eye

Category 16. Cornea disorders

Category 17. Other eye disorders

## Treated/Diagnosed Prevalence of 17 Categories (Preliminary Validation Estimates from 2013 Medicare 5%)

## Diabetic Eye Diseases by Age Group (Preliminary Validation Estimates from 2013 Medicare 5%)

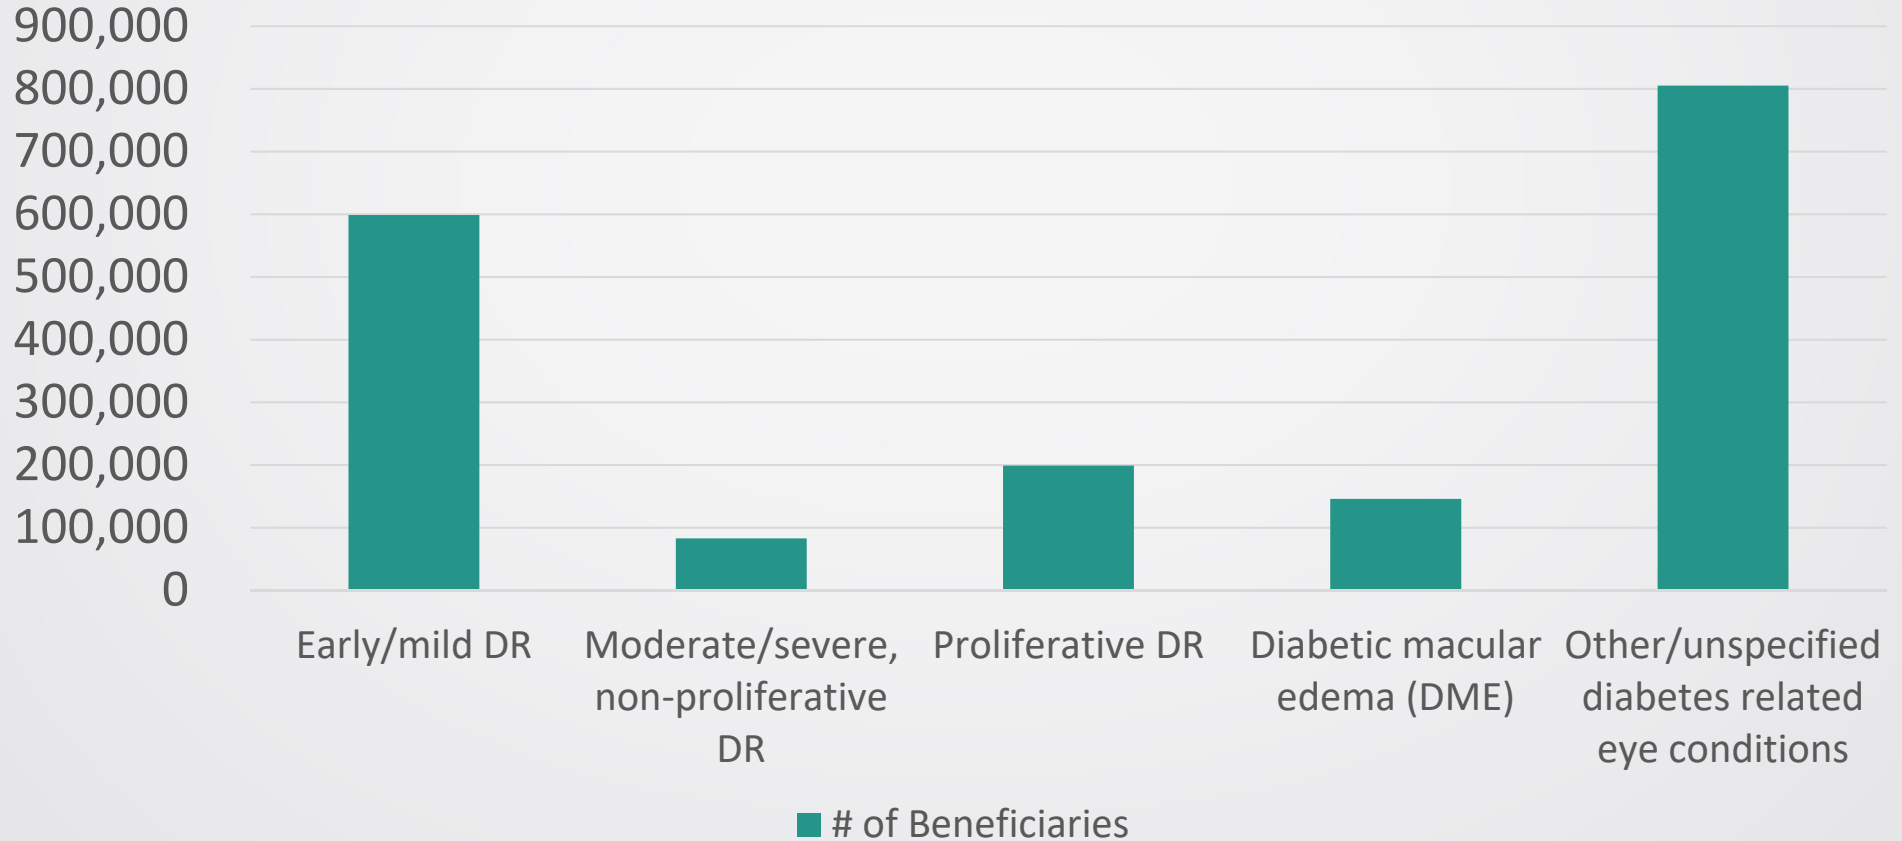

<b>Diagnosis Categories</b>	
Category 1. Retinal Detachment and Defects	
Category 2. Diabetic Eye Diseases	
Category 3. Age related macular degeneration	
Category 4. Other Retinal Disorders	
<b>Subgroups</b>	
<b>Category 2 Diabetic Eye Diseases</b>	
Category 7. Disorders of Refraction and accommodation	Subcategory 2.1 Early/Mild Diabetic Retinopathy
Category 8. Blindness and low vision	Subcategory 2.2 Moderate /Severe Non-proliferative Diabetic Retinopathy
Category 9. Strabismus and amblyopia	Subcategory 2.3 Proliferative Diabetic Retinopathy
Category 10. Injury, burns and surgical complications of the eye	Subcategory 2.4 Diabetic Macular Edema (DME, CSDME)
Category 11. Disorders of optic nerve and visual pathways	Subcategory 2.5 Other/unspecified diabetes related eye conditions
Category 12. Other visual disturbances	
Category 13. Infectious and Inflammatory diseases	
Category 14. Orbital and external disease	
Category 15. Cancer and neoplasms of the eye	
Category 16. Cornea disorders	
Category 17. Other eye disorders	

## Diabetic Eye Diseases, by Subcategory (Preliminary Validation Estimates from 2013 Medicare 5%)

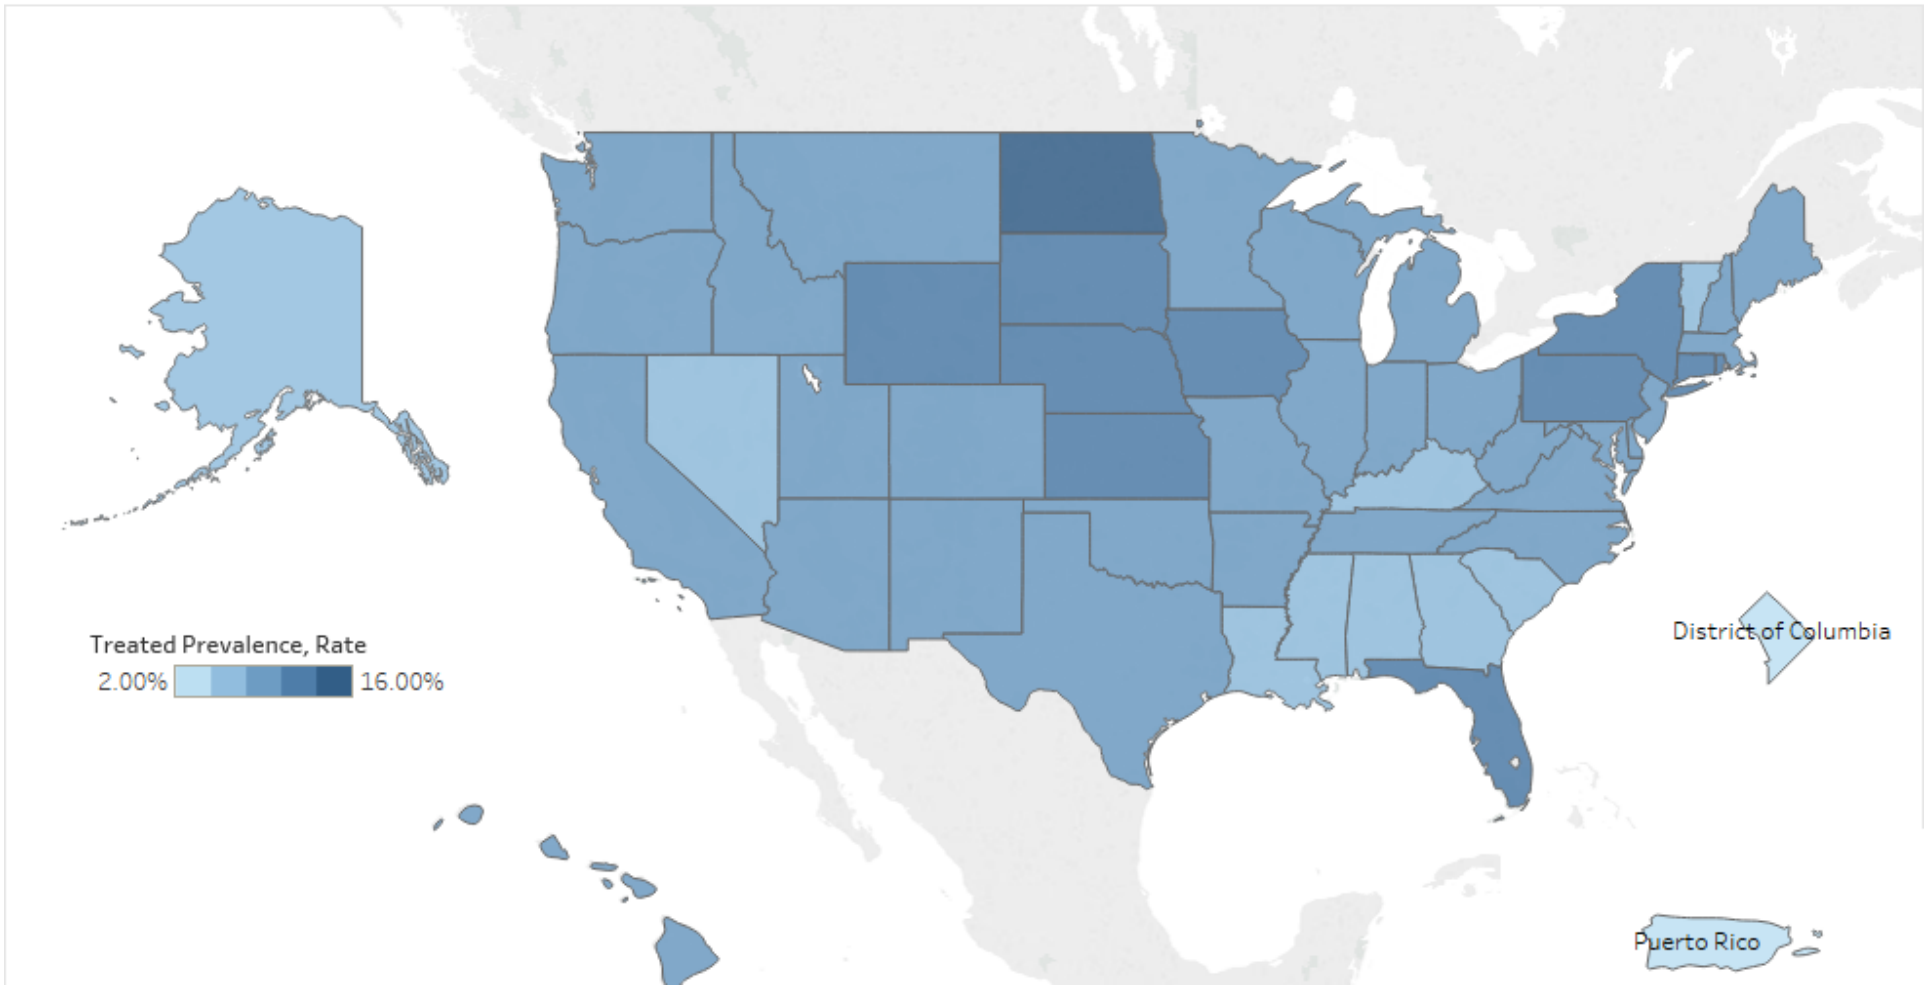

Focus on  
Eye Health  
National  
Summit:

*What's in Sight?*

Age related macular degeneration, Treated Prevalence Rate, 2013 Medicare LDS

## 2. Data Indicator: Service Utilization

- Eye examinations
  - Eye exam procedure codes
  - Exams provided by eye care providers

## Proportion of Beneficiaries Receiving Exam (Preliminary Validation Estimates from 2013 Medicare 5%)

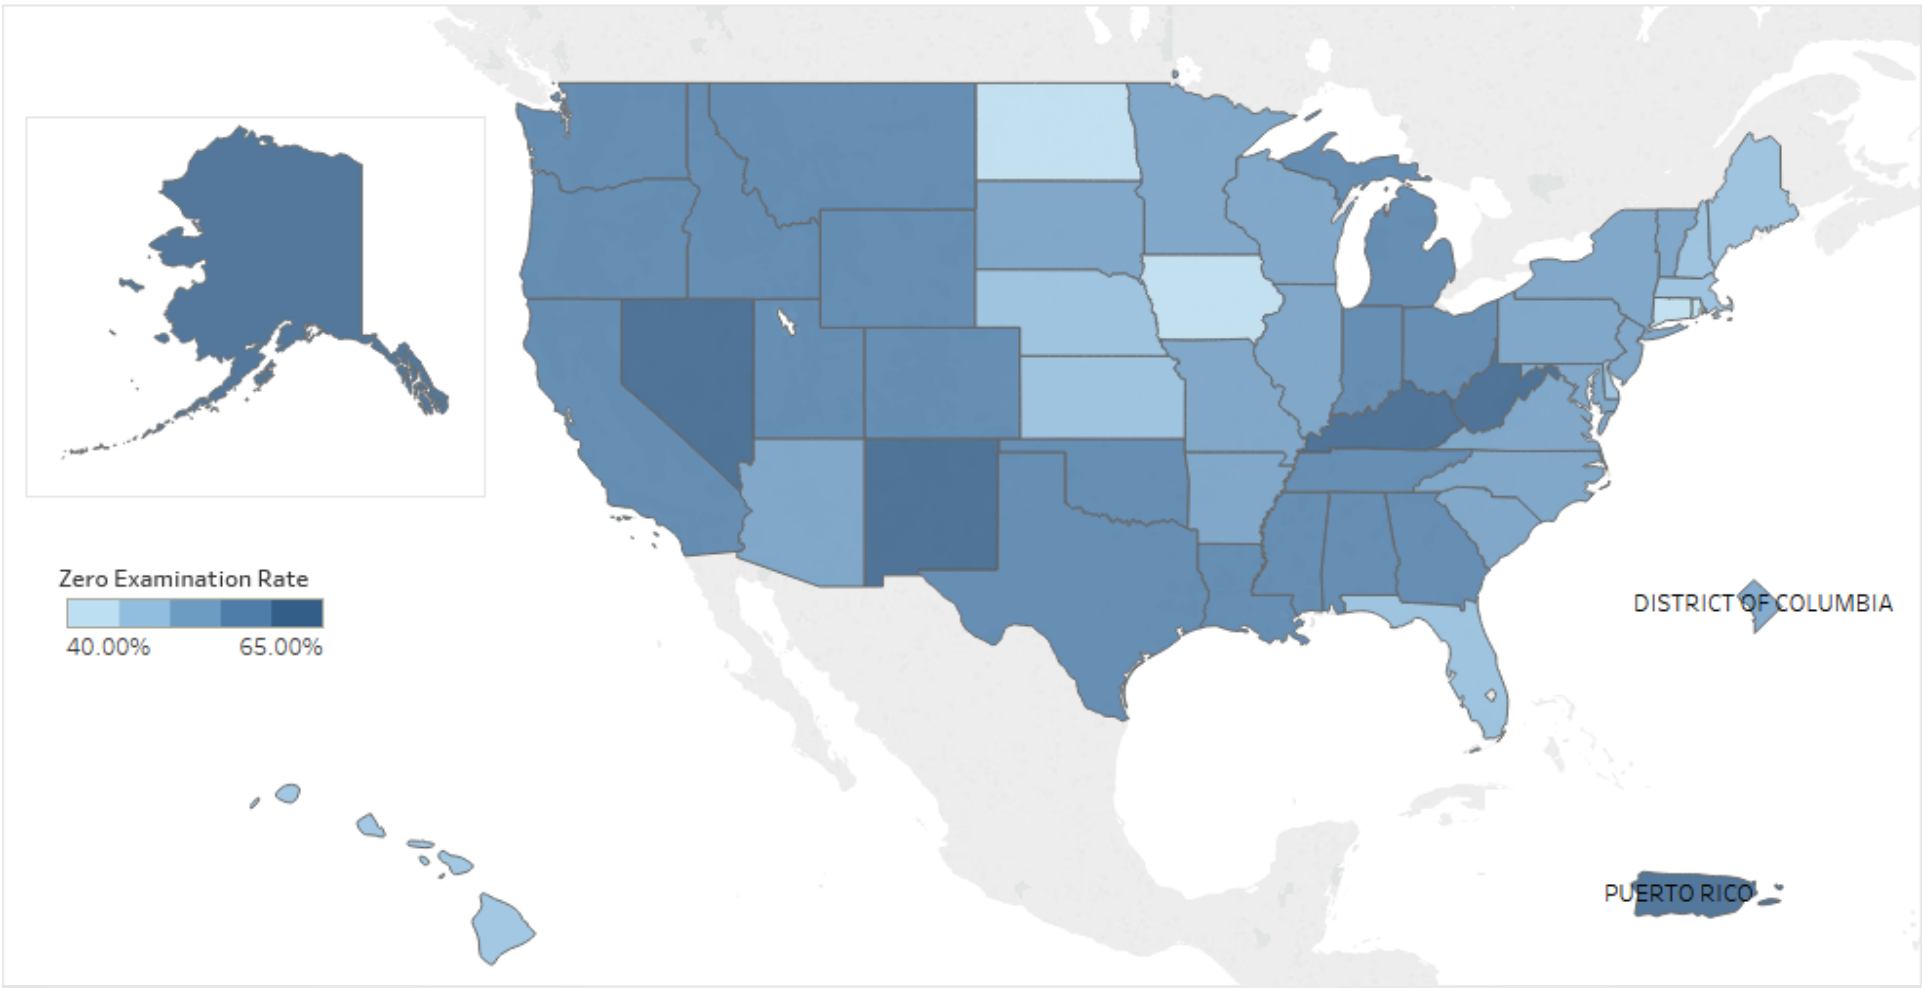

**Focus on  
Eye Health  
National  
Summit:**

*What's in Sight?*

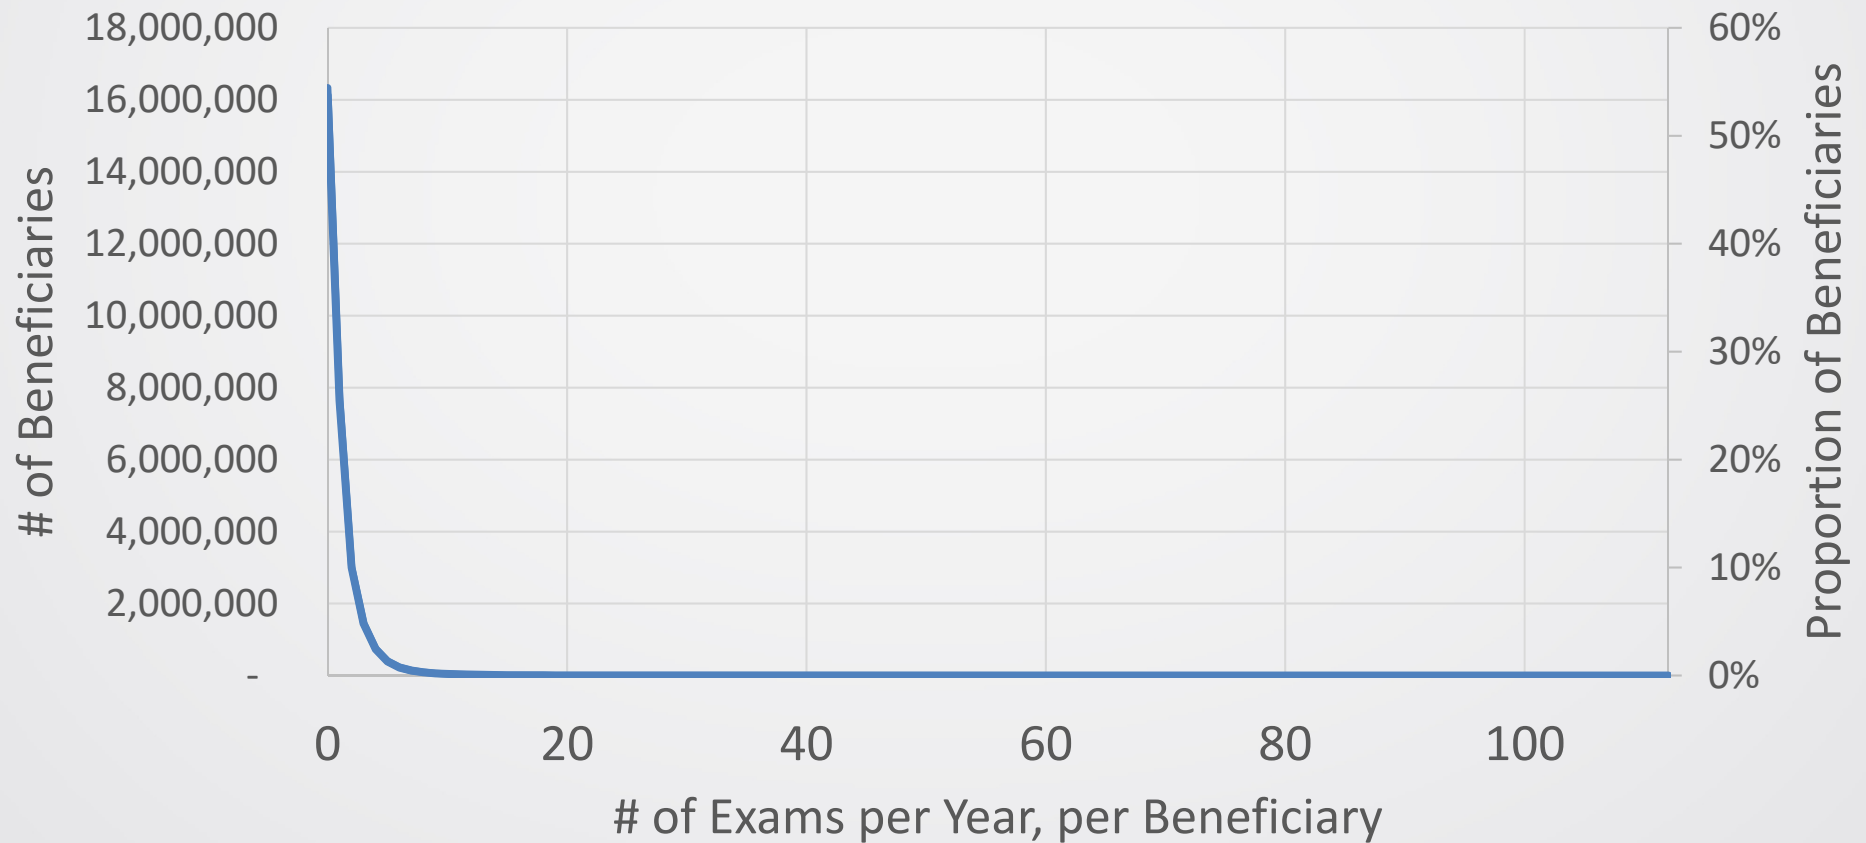

Proportion of Medicare Beneficiaries Receiving No Eye Exam, 2013 Medicare LDS

## Eye Examinations – Frequency (Preliminary Validation Estimates from 2013 Medicare 5%)

### 3. Data Indicator: Visual Function Categories

Visual Function Category	Visual Acuity*
Normal Vision	20/12 – 20/25
Mild Impairment	20/32 – 20/63
Moderate Impairment	20/70 – 20/160
Severe Impairment	20/200 – 20/400
Profound Impairment	20/500 – 20/1000
Near Blindness	<20/1000
Blindness/NLP	No Light Perception
Unqualified visual loss	Unknown or missing
US legal blindness	≤20/200
Monocular Impairment	≤20/70 in worse eye

\*Best-corrected acuity, based on better-seeing eye

# Generating single-source estimates from National Surveys

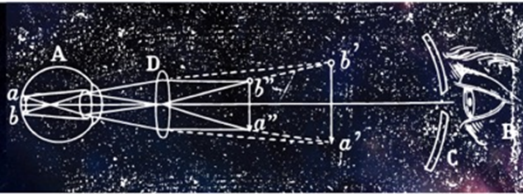

## Define data indicators

- Indicators are the measures that we will capture in each data source
  1. Diagnosis categories
  2. Service utilization
  3. Visual function categories
  4. Surveys instrument categories

## Topics

- Visual Function
- Eye Diseases
- Service Utilization
- Insurance Coverage and Costs
- Examination Measures

## Specific Measures for Each Topic

- Visual Function
  - Adaptive devices
  - Blind of difficulty seeing
  - Difficulty seeing with glasses
  - Hyperopia
  - Length of vision problem
  - Miscellaneous life impacts
  - Myopia
  - Peripheral vision
  - Night vision
  - Vision correction
  - Vision impairment

## Specific Measures for Each Topic

- Eye Diseases
  - Cataract
  - Diabetic Retinopathy
  - Glaucoma
  - Age Related Macular Degeneration

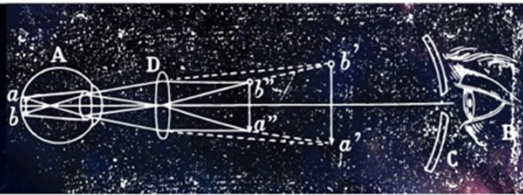

## Review of Approach to Identify Surveys

- Identify national surveys with vision- and eye-health-related data
- Review surveys on multiple criteria
- Recommend surveys for inclusion

## Recommended Surveys for Inclusion

- American Community Survey (ACS)
- Behavioral Risk Factors Surveillance System (BRFSS)
- Medicare Current Beneficiary Survey (MCBS)
- National Health Interview Survey (NHIS)
- National Health and Nutrition Examination Survey (NHANES)
- National Survey of Children's Health (NSCH)

## Topic: Visual Function

### Measure: Difficulty seeing with glasses

ACS (2014) - *Is this person blind or does he/she have serious difficulty seeing even when wearing glasses?*

NHIS (2014 & 2015) - *Do you have any trouble seeing, even when wearing glasses or contact lenses?*

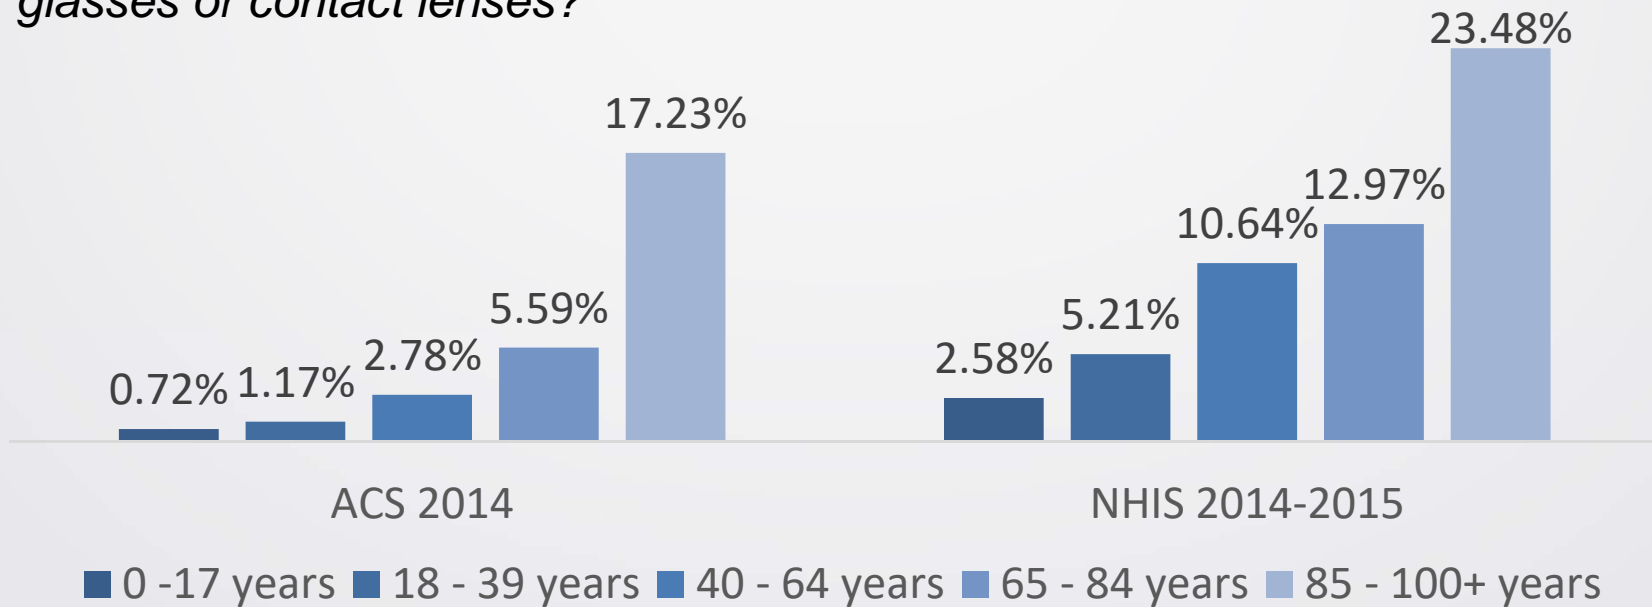

## Topic: Visual Function

### Measure: Difficulty seeing with glasses

ACS (2014) - *Is this person blind or does he/she have serious difficulty seeing even when wearing glasses?*

NHIS (2014 & 2015) - *Do you have any trouble seeing, even when wearing glasses or contact lenses?*

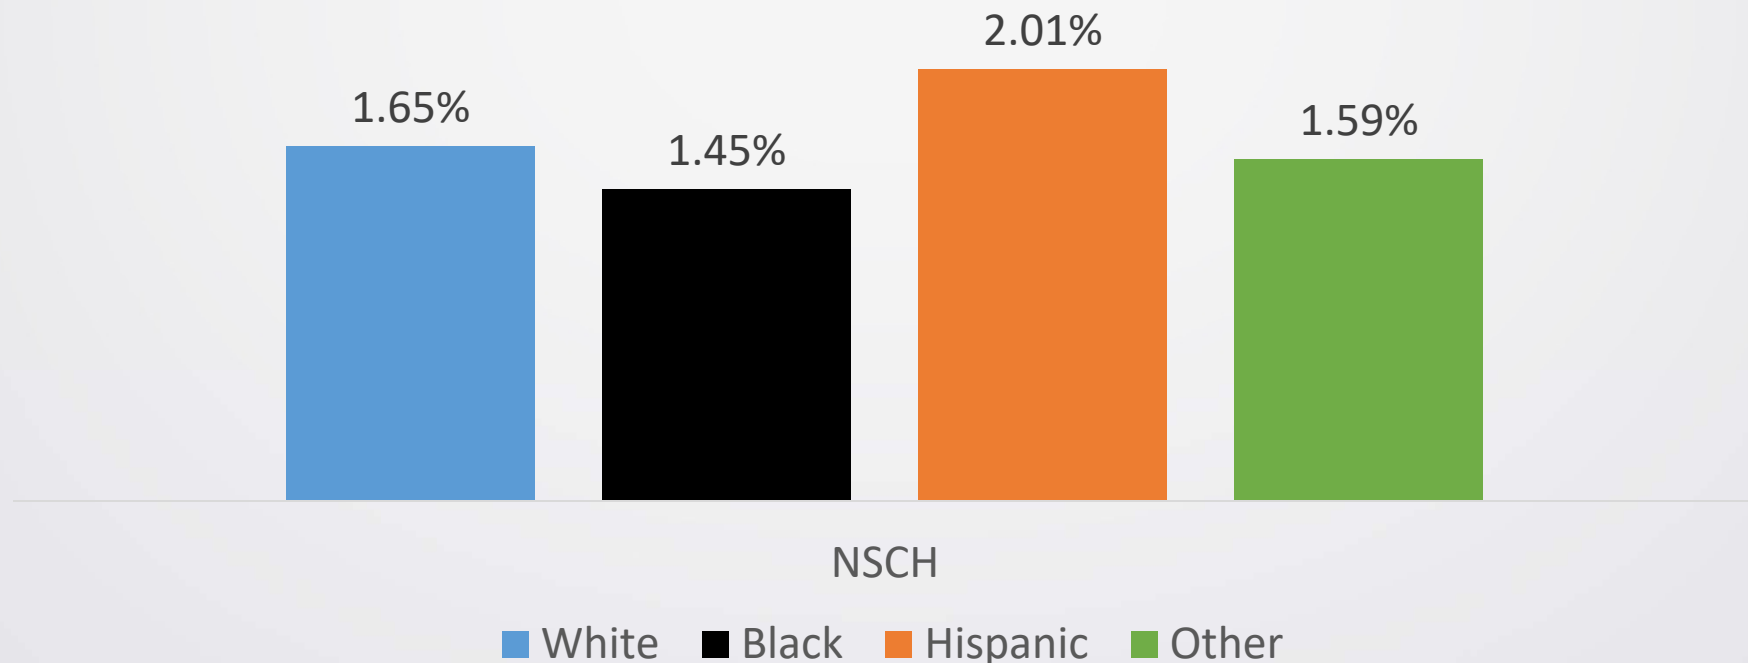

## Topic: Visual Function

### Measure: Difficulty seeing with glasses

*NSCH (2007, 2011/2012) - Has a doctor or health professional ever told you that child has vision problems that cannot be corrected with glasses or contact lenses?*

## Topic: Visual Function

### Measure: Difficulty seeing with glasses

*NSCH (2007, 2011/2012) - Has a doctor or health professional ever told you that child has vision problems that cannot be corrected with glasses or contact lenses?*
